

Genius, Technology and Precision at the service of Companies

Improve your performances

For over 30 years, our experience, competence and quality products allow us to be a point of reference for those companies that need standard and special precision tools.

We produce tools for different sectors being we are known as a reliable partner, with a great experience in consulting and creations of customized solutions.

We support our customers by simplifying and contribute to maximize productivity, reducing costs and increasing their quality.

We continuously dedicate resources to keep high technological levels in our company. We are able to produce high performance tools in order to satisfy your needs.

We work with high quality materials with the best expertise and technology.

WE MAKE

- * Tools for milling, turning, drilling, boring, threading and broaching
- * Circular profile mills
- * Polycrystalline diamond and CVD tools
- * Tools for machining composite materials
- * Equipment and accessories for automatic screwdrivers
- * Carbide tool holders

Quality Control

PROFILE CHECK: Thanks to a **high precision measuring machine**, we are able to **certify** that the tools meet the required dimensional tolerances.

CUT QUALITY: We have acquired a powerful **3D measuring device** to evaluate the roughness and geometry of the cutting edge, to ensure **repeatability** and **consistency** in the performance of our tools.

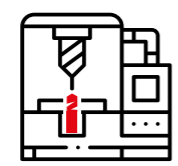

Latest technology for high performance results

CONSULTING

PLANNING

CONSTRUCTION

QUALITY CONTROL SYSTEM

MICTU high performance products are due to a sophisticated **design stage** and **virtual simulations**, following the production on the **latest generation cnc machines**. Furthermore, our deep knowledge of cutting dynamics and post-grinding manual processes. A series of heterogeneous machines allow us to optimize our production.

AUTOMOTIVE & AEROSPACE
PRECISION MECHANICS

MEDICAL
INDUSTRY

OPTICS

DIAMOND

Mictu special and standard tools

When the standard solutions are not sufficient, we can develop **special tools** in order to meet high performance requirements on specific machining.

RECONDITIONING

In order to reduce costs and disposal problems, we can offer when possible a tool **repair service** by re-sharpening and re-application of the coating.

Services

AUTOMATED WAREHOUSE

We have an **automated warehouse** which solve lots of problems regarding the **storage**, the **purchase** and **organization** of the goods for those companies that require this type of service.
